REACH REGISTRATON STATEMENT

Dear Customer,

according to the TITLE II, Article 2(9), of the Regulation (EC) No 1907/2006 (REACH Regulation), polymers are exempted from registration obligation and therefore we have no duty to register DINALEN.

Manufacturers or importers of polymers must, however, submit a registration for the monomer substance or any other substance(s) in the final product, that have not already been registered up the supply chain.

We are hereby informing you that Vinyl Chloride Monomer (CAS 75-01-4) has been registered by Adriaoil S.p.A, Milano (*Only Representative* for DINA-Petrokemija).

Vinyl Chloride Monomer registration number is 01-2119458772-30-0031

Regarding the other substances we use in the production of our materials, we can confirm that all products supplied to customers contain substances that are registered or are REACH exempt.

If you have any question, please do not hesitate to contact us.

Best Regards,

Feda Štulić
